

What is Regional Collaboration?

- To collaborate with another organization for mutual benefit to both organizations
- Increase efficiencies by eliminating duplicative services
- Add or improve services you can't afford to deliver on your own
- Provide services more cost effectively

Why regionalization?

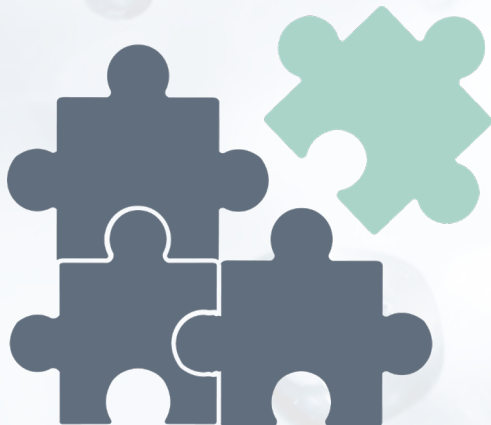

Regionalization, partnership, collaboration and restructuring simply means working together. It is becoming increasingly difficult to sustain public water systems as regulations increase, infrastructure deteriorates, and operating costs increase. These and other challenges utilities face on a regular basis make it difficult for them to do it alone.

What are the benefits?

- Minimizes or eliminates redundancies
- Develops capacity
- Creates sustainability
- Creates economies of scale

RCAP Solutions' Role

RCAP Solutions staff will facilitate the process and involve key entities to ensure regional utilities and communities succeed in their efforts. RCAP oversees the process and guarantees transparency through communication and integration of all stakeholders. RCAP also convenes and facilitates networking opportunities and functions as a neutral party among all stakeholders.
