Benefits of Working with RCAP Solutions

Our staff has demonstrated expertise and qualifications to help small and midsize communities with data collection and mapping. Our qualified team, combined with state-of-the-art equipment and software delivers an extremely accurate representation of a system. The benefits of working with RCAP Solutions for your GIS needs include:

- Greater efficiency & more productive field work
- Ability to view & track trends
- Mobile applications for daily workflows
- Ongoing RCAP training & support
- Reduced or eliminated use of outdated system maps
- Modern, cost-effective solutions for small, rural utilities
- Certified water & wastewater operators on RCAP staff

RCAP Solutions offers comprehensive GIS solutions designed to provide the latest web and mobile technologies to small, rural water and wastewater utilities. Harnessing the power of ESRI’s GIS software and platform, RCAP is able to tailor customizable GIS products specific to the needs of the utility.

In addition to our full-time staff, we utilize the latest software, high-accuracy GPS units, wide format scanners and printers, and IT support to deliver comprehensive GIS and mapping services, including:

- GPS Data Collection
- ESRI ArcGIS Online Solutions
- ESRI Collector & Mobile App Development
- Development of Asset Management Plans & Inventories
- GIS Maintenance & Support
- Large format GIS map printing & scanning
- GIS & Asset Management Training
- Customized solutions for rural water, wastewater, & stormwater utilities
- Customized solutions for rural water, wastewater, & stormwater utilities

Utilizing the newly developed ESRI multi-tenant approach, RCAP is able to provide a high level service at an affordable cost for small utilities. RCAP will work with your system to develop a GPS data collection and GIS mapping strategy that will allow the system to begin implementing web and mobile GIS maps very quickly and efficiently. The online web maps and apps provide significant value to utility secretaries, operators, managers, and board members.

RCAP Solutions provides services on a very competitive fee-for-service basis. We will work with you to determine the best options for your utility or community.

RCAP Solutions can help communities through webinars, on-site training, and workshops. Our goal is for utilities to incorporate their GIS into daily workflows, and utilize the web and mobile apps to the fullest extent. This will occur when staff is equipped with the knowledge and have opportunities to reinforce learning through practice.

We Offer Training in these Areas:
- Systems Operations (Including GIS Mapping & Energy Audits)
- Asset Management for Water & Wastewater Systems
- And much more...
