

North Central Massachusetts Private Well Program 2021 Eligible Communities

May & June

July & August

September & October

Above we have outlined the six towns whose residents are eligible for a complimentary well assessment and water test during 2021 and in which months the assessments will be conducted. Well assessments and water testing will be scheduled to occur during regular business hours, Monday through Friday only. Forty (40) slots are available in each town.

The success of our efforts in these towns will guide the implementation of the program into other communities over the next several years and the development of solutions to improve the quality and safety of private well water.

For more information or to request an assessment, please visit: www.rcapsolutions.org/ma-private-wells
