

The Rural Community Assistance Partnership (RCAP Solutions) and the Keuka Watershed Improvement Cooperative (KWIC) are hosting a special presentation of the New York Onsite Wastewater Treatment Training Network's (OTN's)

“Inspection of Existing Residential Onsite Wastewater Treatment Systems”

For onsite wastewater system inspectors and other professionals:

- Do you want to learn more about the proper functioning of residential septic systems?
- Do you want to know how to complete an inspection of a septic system with knowledge and confidence?

RCAP and KWIC are collaborating with retired, multi-term Chair of the OTN, Mark Noga, to bring you this popular 1-day event for onsite wastewater professionals

- Our step-by-step process walks you through a home septic system inspection like a pro
- Become a trusted resource in your region for residential septic system inspections
- Includes both classroom and field instruction

Instructor Mark Noga, former OTN Chair and active environmental trainer, has many years of field experience as an onsite wastewater system professional and educator.

Space is limited so register early!
